

# Page - Product Catalogue

We require a page template using Shopify 2.0 sections to be created for a list of all our active products. This section is to take the metafields listed above as inputs.

This template will use the existing stylesheet for the theme. It will also use the custom styling included in the final Custom HTML section used on the page.

## Styling

- **Theme:** The website is using Shopify theme Warehouse 2.7.2
- **Template:** All styling provided in Shopify template *"page.pricing.json"*
- **Branding:** [Link to branding document](#)
- **Inspiration:** [Example #1](#)
